WELCOME TO MONTPELLIER

It is with great enthusiasm that I invite you to the First Masterclass of the European Society of Unilateral Biptoral Endoscopy (ESUBE) in Montpellier, France, from May 8 to 10, 2025. This inaugural event marks an exciting new chapter for our community, bringing together spine surgeons, researchers, and medical professionals dedicated to advancing biportal endoscopic spine surgery. It offers a unique opportunity to learn from each other and shape the future of this dynamic field. A distinguished team of global experts from Europe, Asia, and the Americas will deliver cutting-edge presentations, live surgery sessions, on-stage demonstrations, and hands-on workshops. You'll observe leading surgeons in action and refine your biportal endoscopic techniques under their guidance.

We've also curated scientific sessions and case discussions on complex spinal pathologies, innovative research, and patient management. These collaborative forums provide a space to share insights, ask questions, and exchange experiences.

Beyond the academic program, the event is an ideal opportunity to connect with a global community of professionals passionate about minimally invasive spine surgery. Whether in sessions, networking breaks, or strolling through the streets of Montpellier, these interactions promise to spark new ideas and lasting collaborations.

We hope you will join us for this landmark event to advance biportal endoscopy and improve patient outcomes worldwide.

Warm regards,
